

User Manual

Here is a complete guide to use Game store information system.

- Fill all the text fields with valid input string for product id and product name, chose category using combo box, select the specification using radio button and finally integer for price.
- Make sure to enter unique ID while adding data to the table.
- In order to add the data to table click add button highlighted with green.
- In order to clear the text field click the clear button highlighted with red.
- To search the product by its price fill the text field on the middle left of the GUI before the search by price button and press the button after filing the text field.
- To search the product by its category choose the category from the combo box on the middle right of the GUI right above the table before the search by category button and press the button after choosing category on combo box.
- To exit from the system simply click the menu bar item file and click exit on the drop down menu.
